Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification did not specify that the status generator (Fig. 1, element 210) is capable of generating “digital” status report. The word “digital” (See claims 1, 11, 13 and 14)” is not mentioned and therefore is considered new matter.

Allowable Subject Matter

Claims 15-16 are allowed.

The following is an examiner's statement of reasons for allowance: In claim 15, the limitation of an optical disk controller for performing signal processing for an optical disk, comprising: a status generator for generating status reports each representing the operation state of the optical disk controller; and a status sampling section for selectively sampling the status reports, wherein the status sampling section comprises a sampling interval setting portion for setting a status sampling interval, and wherein the sampling interval setting portion sets the sampling interval according to the rotational speed of the optical disk, is not anticipated by, nor made obvious, over the prior art of record.

Art Unit: 2653

The dependent claims, being further limiting, definite and fully enabled by the Specification, are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
